

Configuration Management Plan

URCVT v.1.2.0 12-NY Configuration Management Plan v.1.0.0 document is solely for use in the State of New York. This document can be expanded or updated as is necessary or required. Any recommendations listed in this document should not supersede user jurisdiction procedures or other controlling governance entities.

URCVT v.1.2.0 12-NY Configuration Management Plan v.1.0.0

URCVT 1.2.0 is a software-only utility. The vendor uses Git as its distributed version-control system to track changes in the source code during software development. It is designed for coordinating work among programmers and is used to track changes in any set of files. Its goals include speed, data integrity, and support for distributed, non-linear workflows. Here is a link to additional Git information: [Git External Documentation](https://git-scm.com/doc/ext) (https://git-scm.com/doc/ext).

Git may be downloaded free via this link: [Git Download](https://git-scm.com/) (https://git-scm.com/).

The Bright Spots developers use GitVersion as the tool to achieve *Semantic Versioning* on the Universal RCV Tabulator software development and upgrades. Additional information is available in URCVT 1.2.0 13-NY Quality Assurance Plan and here: [GitVersion Information](https://datasift.github.io/gitflow/Versioning.html) (https://datasift.github.io/gitflow/Versioning.html).
